

June 2018

Dear Future Honors Algebra 2 Student,

Welcome to Honors Algebra 2! First, we want to make sure you signed up for the right course. If you were successful in Honors Geometry (B or better), you are a hard-worker, and you have a passion for math, then you are in the right course.

In order for you to be prepared for this rigorous course, you need to complete the summer coursework. This coursework covers the basic skills you should have mastered in Algebra 1 to be successful in this course. We will be using an online math program to complete the work.

Steps for Coursework:

1. Go to www.deltamath.com.
2. Create new account either using your novischools email address, or if you do not have one, your personal email address.
3. The teacher code is **696301**.
4. Sign up for Section: HA2 SS Packet 2018-2019
5. Complete the assignment online. There is a penalty applied to every question you get wrong, which means you will have to complete more problems until the assignment is complete.

There will be no exceptions to not having this packet complete. You have the entire summer to work on it. Do not wait until the last minute to complete the packet; you will not have enough time. If you do not complete this packet, you may be assigned to the regular Algebra 2 class. There will be a test covering review material within the first few days of school. The results of this test will help teachers and counselors determine whether your math placement is correct.

Due: First day of school: September 4th, 2018 7:15 am

Have a great summer and see you in the fall!

Sincerely,

NHS Honors Algebra 2 Teachers
